

Talent Analytics Software

TRANSFORM your

BUSINESS

through

DATA

Acendre Talent Analytics provides insight to improve the performance of your Human Resources function. Easy-to-use dashboards and reports deliver information in real-time, providing a unified view of your talent data and empowering you to make important decisions based on the data collated – not guesswork. Transform your organisation by making your data the driver of efficiency and effectiveness.

For more information visit acendre.com

Innovate

- Migrate from spreadsheets to a modern analytics platform
- Replace legacy HR applications
- Embed analytics into your HR workflows

Transform

- **Modernise** – create a data-driven approach to decision making throughout HR
- **Engage** – build a data culture and increase user adoption by enabling all your stakeholders to engage with and collaborate with data
- **Automate** – drive the data process to identify every critical change to your workforce and notify users immediately
- **Innovate** – use data to create innovative processes that solve problems and provide new value to your business
- **Visualise** – move from rows of numbers to charts that tell a deeper story and highlight what you need to know
- **Analyse** – capture essential HR data such as time to hire, application volumes, diversity statistics, job advertising and candidate sourcing

Features

- Easy-to-use drag-and-drop report builder
- Visually display reports with multiple chart type options
- Extensive report templates
- Build personalised dashboards for snapshot reporting
- Custom filters and drill through reports
- Automation and scheduling of broadcast reports
